

ASCEND — Landing Hero Design Stack

Single-viewport mindfulness hero — light minimal, one self-contained HTML file.

Stack

- Single static HTML file — inline `<style>` , optional inline `<script>` for scroll-cue only
- No framework, no build step, no external JS/CSS beyond fonts + one image
- Google Fonts via one `<link>` tag (Manrope, Inter, IBM Plex Mono)
- One local/remote PNG (the halftone hands illustration)

Typography

Role	Font	Weight	Size
Wordmark / H1 / CTAs	Manrope	400 / 600 / 800	20px – 88px (clamp)
Nav links / sub-copy	Inter	400 / 500	14.5px – 19px
Kicker / captions	IBM Plex Mono	500	11.5px – 12px

Color Tokens

-  --paper-top: #f4f3ef
-  --paper-bottom: #ecea3
-  --ink: #191b1e
-  --accent-slate: #5c6b78

```
--paper-top: #f4f3ef;
--paper-bottom: #ecea3;
--ink: #191b1e;
--ink-muted: rgba(25,27,30,.62);
--ink-dim: rgba(25,27,30,.42);
--hairline: rgba(25,27,30,.12);
--accent-slate: #5c6b78;
```

Z-Index Layering

0	.backdrop	(gradient + radial blooms)
1	.grain	(dot-pattern texture, opacity .35)
2	img.art	(halftone hands, mix-blend-mode: multiply)
3	.art-glow	(radial legibility bloom)

```
10 .shell      (nav + hero content)
11 corner captions (fixed)
```

Layout

- 100vh fixed viewport, no scroll, overflow:hidden
- Nav: flex justify-between , wordmark left / 4 links center / pill CTA right
- Hero: flex column, centered both axes, over the art's negative space
- Fixed corner captions bottom-left / bottom-right

Motion

```
@keyframes kenburns { 0%{transform:scale(1)} 100%{transform:scale(1.04)} }
/* 22s infinite alternate, transform-origin 50% 48% */

@keyframes softIn { from{opacity:0} to{opacity:.92} }
/* one-time, 1.6s, comma-chained with kenburns */

@keyframes blurFadeUp {
  from{opacity:0; filter:blur(20px); transform:translateY(38px)}
  to{opacity:1; filter:blur(0); transform:translateY(0)}
}
/* .rise, 1s cubic-bezier(.2,.7,.2,1), per-element inline delay 0-1040ms */
```

Wrapped in @media (prefers-reduced-motion: reduce) to kill both loops.

Responsive Breakpoint

@media (max-width: 960px) : hide center nav links + corner captions, widen art to ~150vw, tighten nav padding.
